PB-72 White

Our Bruiser Illuminated Halo push buttons are now available in stainless steel, muntz or copper with bright center jewels or an unlimited number of cut-through characters, each designed and built for the most demanding vandal resistant applications. Based on our proven

durable positive stop design, this new series takes the Bruiser to the highest level by offering 7 brightly illuminated halo options and an infinite range of character designs. If your next project requires a flush or projecting style push button that is tough and robust enough to meet

the most demanding specifications while adding a bright splash of color, the Bruiser Halo Series is the obvious choice.

Choices. Quality. Solutions.
